

GUARDIAN ANGELS CATHOLIC CHURCH MASTER PLANNING AND CONCEPTUAL DESIGN

Mead, Colorado | 2010 - current

The small parish community of Guardian Angels asked Integration Design Group to assist with evaluating several potential properties for a new 200-seat church building. The new church has been planned to accommodate a social hall and parish offices on the lower level, and will be the first phase of a master plan, envisioning a future 750-seat church.

The parishioners are hoping to maintain the feel of their small country church, even as their parish grows. The design work has been undertaken with the goal of providing a solid foundation upon which the Parish can build for the future.

Integration Design Group has been responsible for leading the site analysis process and helping the Parish to reach consensus regarding the best option for new property acquisition. Conceptual architectural design has been undertaken as well so that an overall project financial plan can be prepared.
